	Urgent	Not Urgent
Important	Do - (Your MVP) ● Get dining hall data from Purdue's dining website. ● Search the menus for my favorite foods. ● Email the results.	Schedule - (For V2.0+) ● Only choose specific dining halls to monitor. ● Run on a cloud server so it doesn't require a computer to be on. ● Set up Cron to automatically run script daily.
Not Important	Delegate - (Use a library) ● Use curl to retrieve dining hall data. ● Use jq to parse JSON menu data. ● Use grep to search menu data. ● Use msmtp to send emails.	Delete - (Cut it) ● Building UI/App to display favorite foods instead of email. ● Have the UI/App list all foods where you can toggle favorite meals on/off. ● Email multiple times throughout the day for each meal time.
